

Dear client,

We are happy to have your database for analysis. While processing the dataset provided, the following inferences were observed.

S.No	Datasheet	No.of records	Unique id's	Receiving Date
1.	Transactions	20002	3495	15/05/2021
2.	Customer Demographic	4002	4002	15/05/2021
3.	Customer Address	4001	4001	15/05/2021

Reviews on the dataset:

1. In the provided transaction dataset there are additional customer id's. This problem would have caused due to the loss of data from the provided set.
2. Various columns in the given datasheets are empty.
3. We have traced inconsistent data type with the same attributes.
4. We have also traced a lot of inconsistent data values with the same attributes.

However, to complete the project we are moving into further investigations and processing of the dataset such as data cleaning, data standardization, data visualization, etc.

"It is our immense pleasure to be working with your given dataset and hoping for the best outcomes".

Regards,

Raghul V
